January 29, 1991

Lena Blais, P.E.
Remediation Technologies Inc.
Suite 207
1011 S.W. Klickitat Way
Seattle, WA 98134

Dear Ms. Blais:

The Historic Resources Documentation package for the Burlington Northern Somers Tie Plant Site submitted to EPA on December 21, 1990 has been reviewed by the Montana State Historic Preservation Office (MSHPO).

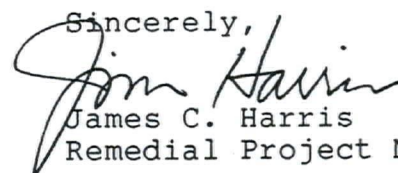

Comments from the MSHPO concerning the package are attached for your information. As was requested by telephone, the original drawings and blue lines/blue prints will be necessary to complete the submittal. Please send the originals of the documents that were included in the report to this office.

Two additional copies of the complete documentation package will be necessary; one for the EPA document control system in Helena and one to reside in a repository near the site. The original Historic Resources Documentation package has been returned to ReTeC's Kent, Washington office.

The MSHPO has indicated that with the addition of the above items, and possibly a limited number of additional photographs of original drawings, the package should be approvable.

Please let me know if you have any questions concerning this request.

Sincerely,

James C. Harris
Remedial Project Manager
